Subject: Announcement of Expanded Operations - Middle East & North Africa

Narendra Odhrani **Dave Volz** **Yogesh Odhrani**

To all:

I am pleased to announce the commencement of operations of **VersaTech Automation Middle East, FZCO**. VersaTech Middle East was established as a strategic addition to VersaTech's worldwide automation products and services business. This new company, a joint venture with a local partner, will directly serve the Middle East market and will operate from a 25,000 square foot facility located in the Jebel Ali Free Trade Zone in Dubai, UAE. The facility includes office space, a climate controlled fabrication and testing area, a calibration room, and a sizeable project staging area. In addition to being a control system design and fabrication center, our Dubai facility will serve as the base of operation for field service and support in the greater Middle East and North Africa regions.

The extensive, worldwide experience of the VersaTech staff, augmented by the facilities, capabilities, business philosophy and financial strength of Versabar, Inc., offers a multi-national company with vertically integrated capabilities unique in the automation and controls business. From PLC's and pneumatic/hydraulic control panels to skid-based hydraulic power units and large chemical injection systems, VersaTech can cost-effectively meet your control system needs. For more information about VersaTech, please visit our website at <http://www.vtechas.com/>.

We welcome the opportunity to serve your automation needs.

Sincerely,

A handwritten signature in blue ink, appearing to read 'David R. Volz, Jr.', is written over a light blue background.

David R. Volz, Jr.
President
